State of California Business, Transportation & Housing Agency Department of Transportation

Action Item

for 2002 STIP

**POLICY MATTERS** 

CTC Meeting: August 22-23, 2001

Presentation of STIP Fund Estimate

Prepared By: Rick Terry Division Chief Budgets (916) 654-4556

Agenda Item: 4.2b. - **REVISED** 

Original Signed By

MARK LEJA Acting Chief Financial Officer August 1, 2001

# 2002 STIP FUND ESTIMATE RESOLUTION G-01-25

## **BACKGROUND**

The California Department of Transportation (Department) manages the nations largest and most complex multi-modal transportation system. Administration of such a system requires extensive planning and long-term financial forecasts. The State Transportation Improvement Program (STIP) Fund Estimate (FE) is an estimate of all the resources available at the state level for the State's transportation infrastructure over a specified period of time.

Statutes require the Department to present a FE to the California Transportation Commission (Commission) by July 15, and the Commission to adopt a FE by August 15 of each odd-numbered year. Each even-numbered year, the Commission is required to adopt a STIP based on funding identified in the adopted FE. The 2002 FE covers a five-year period from 2002-03 through 2006-07, with an additional two years detailed for the Advanced Project Development Element (APDE). The FE provides an estimate in annual increments of all Federal and State funds reasonably expected to be available for programming in the subsequent STIP.

### **DISCUSSION**

The Department presented an overview of the process, schedule, and special issues that may impact the fund estimate at the Commission's May 2-3, 2001 meeting. At the Commission's June 6-7, 2001 meeting, the Department presented and the Commission adopted the 2002 Fund Estimate Assumptions. At the following meeting on July 11-12, 2001, the Department presented the Proposed 2002 STIP Fund Estimate. A subsequent FE workshop was held on July 25, 2001.

# CHANGES TO THE FUND ESTIMATE FOLLOWING JULY 2001 COMMISSION MEETING

The 2002 Fund Estimate being presented for adoption provides an additional \$634 million in capacity for programming compared with the draft FE presented in July which results in a total of \$3.882 billion new programming capacity for the 2002 STIP.

# **Contingency for delivery shortfall**

The Draft FE presented in July assumed a "contingency for delivery shortfall" that is a carry over assumption from the 2000 FE. When the assumptions were developed, we only had one year of delivery that exceeded the programmed level. Since this was a one-time occurrence and not a trend, the Department recommended the Commission continue its use of the contingency assumption. Current data indicates delivery at the State and Local level has exceeded the programmed level for the second consecutive year, thereby establishing a trend. This change in delivery pattern required a re-evaluation of the contingency assumption and the implementation of a more prudent fiscal policy. As a policy decision, the Department is recommending that the assumption for Contingency for delivery shortfall be rescinded. This represents a reduction of \$854 million from the draft SHA Fund Estimate presented in July and will reduce the net programming from \$2.536 billion to \$1.682 billion. In the event a delivery shortfall occurs in the future, the resources will be subject to SB 45 guidelines of the twenty-five percent / seventy-five percent split between ITIP and RIP.

Therefore, it is recommended that the assumption of "contingency for delivery shortfall" be rescinded.

### **Legislative Changes**

This final draft of 2002 Fund Estimate reflects legislative changes contained in the 2001-02 Budget Act. Capital Outlay Support (COS) received a reduction of \$6.1 million in the State Highway Account (SHA) and Federal Trust Fund; and the facilities line was reduced by \$5 million in 2002-03 and increased by \$2 million in 2001-02 to reflect the approval in the 2001-02 budget act of expenditures for the Eureka office building that had been projected for 2002-03.

Additionally, Public Transportation Account (PTA) revenue was reduced by \$106 million. This is based on the passage of AB 426 (Chapter 156, Statutes of 2001) that exempts from sales taxes diesel fuel used in farming activities and food processing. The PTA FE also includes a reduction to the State Transit Assistance Program of \$53 million caused by this decrease in revenue. Additionally, the State Transit Assistance Program was reduced by \$26 million in 2002-03 to reflect a component of the Transportation Refinancing Plan that was not enacted. The total reduction in funds available for programming in the PTA FE is \$27 million.

### **Reduction to STIP Capital Outlay Support**

Expenditures for Capital Outlay Support includes project direct support plus indirect operational costs related to construction claims, training, day labor and other administrative overhead. In the Draft presented in July, all of the Capital Outlay Support indirect costs were inadvertently included in the STIP COS line instead of being distributed to SHOPP and Local Assistance. This has been corrected in the final FE, resulting in an reduction to the STIP COS line of \$638 million and increases to the COS level in SHOPP (\$581 million) and Local Assistance (\$57 million).

In addition, STIP capital outlay support was reduced by \$657 million to reflect only the current STIP. This change highlights the need for programming additional support for projects in the 2002 and future STIPs. The total reduction to STIP COS is \$1.295 billion (\$638 million and \$657 million)

### **Reduction to SHOPP Capital Outlay Support**

In addition, the SHOPP support level has been reduced to represent a more accurate level of support required to deliver projects. This change resulted in \$207 million reduction to SHOPP support.

## **Reduction to TCRP Capital Outlay Support**

The Traffic Congestion Relief Program support was reduced to zero after 2002-03 thereby reducing \$228 million in order to reflect only the current program levels. These changes highlight the need for programming additional support for projects in the 2002 and future STIPs.

# **Removal of Unprogrammed County Shares**

In consultation with Commission staff, the Department reduced STIP capital expenditures (cash flows) for Highway and Local Roads by \$398 million and Mass Transit and Rail by \$16 million as this represented unprogrammed resources from the 2000 FE.

### **Net Impact of changes to the SHA FE**

The following changes as outlined above are recommended:

•	Elimination of Contingency for delivery shortfall	\$854 million
•	Reduction based on Legislative Changes	\$6 million
•	Reduction to STIP COS	\$1.3 billion
•	Increase to SHOPP COS	\$374 million
•	Increase to Local Assistance COS	\$57 million
•	Reduction to TCRP support	\$228 million
•	Reduction to STIP capital	\$414 million

### **SUMMARY**

With approval of these recommended changes, the 2002 Fund Estimate provides \$3.9 billion in capacity for the Commission to program for the State's transportation system over the next five years. The total funds available for new programming breaks down as follows:

•	State Highway Account	\$3.198 billion
•	Public Transportation Account	\$182 million
•	Traffic Improvement Fund	\$502 million
	STIP Total -	\$3.882 billion

• Aeronautics Account. \$23 million

### RECOMMENDATION

The Department recommends the adoption of the 2002 STIP Fund Estimate as presented in the attached documents.

# CALIFORNIA TRANSPORTATION COMMISSION Adoption of 2002 STIP Fund Estimate

#### Resolution No. G-01-25

- WHEREAS the 2002 State Transportation Improvement Program (STIP) will include the five fiscal years ending with fiscal year 2006-07 and the 2002 State Highway Operation and Protection Program (SHOPP) will include the four fiscal years ending with fiscal year 2005-06, and
- WHEREAS the first two years of the five-year 2002 STIP are the last two years of the four-year 2000 STIP, so that three new program years are added, and
- WHEREAS the three new program years are the first three years of the four-year STIP county share period, and
- WHEREAS Government Code Sections 14524 and 14525 call for the Department of Transportation (Caltrans) to present and the California Transportation Commission to adopt a biennial STIP Fund Estimate to include an estimate of all state and federal funds reasonably expected to be available for the biennial STIP, including the amount that may be programmed in each county for regional improvement programs, and
- 1.5 WHEREAS Section 14529.01 of the Government Code, as added by Chapter 783 of the Statutes of 1999 (AB 1012, Torlakson), requires that each fund estimate, "designate an amount to be available for the advance project development element, which shall be not more than 25 percent of the programmable resources estimated to be available for the first and second years following" the STIP period, and
- WHEREAS Caltrans, in accordance with Government Code Section 14524, presented its Draft 2002 STIP Fund Estimate at the July 11-12, 2001 Commission meeting and updated that Draft at the August 22-23, 2001 Commission meeting, and

- WHEREAS the Caltrans Draft 2002 STIP Fund Estimate is generally consistent with the requirements in Government Code 14524, and
- WHEREAS the Draft Fund Estimate identifies a total of \$3.612 billion in additional programming capacity for the 2002 STIP, plus \$954 million for the advance project development element, and
- WHEREAS the Commission has considered the assumptions and information in the Draft 2002 STIP Fund Estimate, which include projections of revenue for state and federal transportation funds, existing STIP project commitments, and a review of the needs and requirements for funding other parts of the state transportation program including the SHOPP, and
- 1.10 WHEREAS STIP funding consists primarily of Federal funds and State funds needed to match Federal funds, thus limiting the opportunity to use State only funding for projects, and
- WHEREAS the Commission's adoption of the 2000 STIP in December 2000 included a State only funding policy generally giving blanket approval for local projects under \$750,000 and, until March 2001, for all local road rehabilitation projects, regardless of cost, and providing for approval of other projects on an exception basis, and
- 1.12 WHEREAS the Commission, after receiving a report and recommendation from Caltrans, modified that policy in March 2001 to limit the blanket approval for projects under \$750,000 to those already programmed and to remove the blanket approval for larger rehabilitation projects, and
- 1.13 WHEREAS the Commission stated its intent in March to review the availability of State only funds and the State only funding policy in conjunction with the adoption of the 2002 Fund Estimate, and
- 1.14 WHEREAS Caltrans has presented its recommendation regarding State only funding policy at the August 22-23 meeting,
- NOW THEREFORE BE IT RESOLVED that the California Transportation Commission hereby adopts the 2002 STIP Fund Estimate, as updated by Caltrans at the Commission's August 22-23, 2001 meeting, to include \$3.612 billion in new capacity for the STIP (\$2.928 billion from the State Highway Account, \$182 million from the Public Transportation Account, and \$502 million from the Transportation Investment Fund), plus \$954 million for the STIP Advance Project Development Element (\$698 million State Highway Account, \$96 million Public Transportation Account, \$160 million Transportation Investment Fund), and

- BE IT FURTHER RESOLVED that county and interregional shares are made available without regard to funding source, although the Fund Estimate separately identifies statewide STIP funding for the State Highway Account (which includes Federal funds), the Public Transportation Account, and the Transportation Investment Fund, and it is the Commission's intent to take advantage of statewide funding flexibility so that regional programming is not constrained by restrictions on any one of the funding sources, and
- 2.3 BE IT FURTHER RESOLVED that the Commission expects most STIP projects to qualify for Federal funding and will approve the allocation of State only funding for new projects in accordance with criteria specified in the Commission's revised State-only funding policy (Resolution G-01-26), as approved on August 23, 2001, which generally gives blanket approval for local projects under \$750,000, subject to the availability of funds, and
- BE IT FURTHER RESOLVED that the Commission intends to consider advance approvals for State-only funding as part of the adoption of the 2002 STIP where RTIPs designate projects for State only funding, the projects are consistent with the State only funding policy, and appropriate exception requests are submitted to Caltrans by December 15, 2001, and
- 2.5 BE IT FURTHER RESOLVED that the Commission requests that Caltrans, in cooperation with Commission staff, distribute copies of the 2002 STIP Fund Estimate, including estimates of county and interregional shares for the current STIP period, for the four-year county share period ending fiscal year 2007-08, and for the advance project development element, to each regional agency and county transportation commission.

## 2002 FUND ESTIMATE TABLES COUNTY AND INTERREGIONAL SHARES

### Carryover Balances

<u>Unprogrammed Balance (Balance Advanced)</u>. These 2 columns identify the current county share balance to be carried forward. All programmed APDE projects have been deducted from the county share in arriving at this balance.

<u>Projects Lapsed</u>. This is the amount that has been deducted from each share for projects that were deleted from the STIP because they were not allocated before the end of the fiscal year programmed or by the time of any extension granted. This amount is to be added back into the balance available for the new county share period.

#### 2002 STIP Share

New 3-Year Formula Share. This is each county's distribution of the 2002 STIP's new programming capacity.

<u>Total Current Share (Advances Remaining)</u>. This is the sum of the carryover balance, the return of lapsed funds, and the new 3-year formula share. It represents the amount guaranteed to be available for programming from each share. It assumes that all currently programmed APDE projects are deducted from the county share. If any current APDE project will remain an APDE project in the 2002 STIP (for example, the project will not be programmed for right-of-way or construction), the amount for that APDE project may be added back to the Total Current Share.

## Potential Advance of County Share

4th Year Formula Share. This is each county's distribution of the Fund Estimate amount for FY 2007/08, which is the fourth year of the 4-year county share period defined in statute and the first year beyond the 2002 STIP period. This amount is guaranteed within the 4-year county share period and is potentially available, though not guaranteed, in the 2002 STIP. RTIPs may identify projects for current programming from this amount, identifying such projects separately.

<u>Potential Total (Advances Remaining)</u>. This is the sum of the Total Current Share Available and the 4th Year Formula Share. It represents the maximum that may be programmed in a county in a region with over 1 million population (excluding APDE programming). Smaller regions may, in addition, propose an advance for a single larger project, provided that the advance does not exceed 200% of the county share for the current 4-year period (that is, 200% of the sum of the New 3-Year Formula Share and 4th Year Formula Share).

### **Advance Project Development Element Shares**

<u>2002 STIP APDE Share</u>. This represents the maximum that may be programmed for APDE projects in the 2002 STIP. This is a new total, replacing (not adding to) the APDE share for the 2000 STIP. Any carryover 2000 STIP APDE project that will remain in the 2002 STIP (that is, no right-of-way or construction is being programmed) is to be deducted from this share.

<u>Current APDE</u>. This is the total of all APDE projects currently programmed, regardless of whether the projects will or will not remain APDE projects in the 2002 STIP.

Net Now Available. This is the 2002 STIP APDE share less the total of all APDE projects currently programmed.

# 2002 STIP FUND ESTIMATE

COUNTY AND INTERREGIONAL SHARES
Includes STIP Amendments and Allocations Through July 2001
